PROFESSIONAL SUMMARY

I'm a Fullstack Software Developer with experience building scalable web applications and cloud-native systems. I specialize in backend optimization, API integration, and database management using Java, Node.js, Python, and SQL-based technologies. I've successfully implemented solutions with frameworks like Spring Boot, Django, and React. I've led performance improvements and CI/CD automation in both startup and enterprise environments, and collaborated using Agile methodologies. I hold a Bachelor's in Software Engineering and another in English Teaching, which has strengthened my communication and documentation skills in both Spanish and English. I'm passionate about continuous learning, system reliability, and user-centered design.

TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, TypeScript, Python, C++, SQL, HTML5, CSS3
- Frameworks & Libraries: Spring Boot, React, Angular, Node.js, Express, Django, Flask, Vue.js
- Databases: MySQL, PostgreSQL, SQL Server, MongoDB, Firebase
- Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), Docker, Jenkins, GitHub Actions, Kubernetes, Terraform
- Tools & Platforms: REST APIs, Postman, Swagger, VS Code, IntelliJ, NetBeans, Figma
- Project Management: JIRA, Trello, Notion, Monday.com, Microsoft Project, Power BI, Tableau
- System Administration: Windows Server, Linux, Active Directory, DHCP, DNS, VPN
- Security & Virtualization: VMware, Hyper-V, Backup & Disaster Recovery, Patch Management

PROFESSIONAL EXPERIENCE

Fullstack Software Developer

Adroit Overseas – Phoenix, AZ | Jun 2023 – Present

- Boosted user engagement by 25% and increased revenue by 20% through frontend and UX optimizations.
- Enhanced backend performance by 30% via Node.js and MySQL tuning.
- Cut development cycles by 15% through integration of third-party APIs.
- Led migration to MongoDB, improving app speed by 25% and reducing server costs.
- Advocated Agile best practices and fostered collaboration with Git workflows.

Database Specialist & Welding QC Assistant

Performance Contractors (Intel Project) — 2021 – 2022

- Inspected structural welding quality in high-precision environments.
- Collaborated with Intel engineering teams for compliance and documentation.
- Managed and maintained internal databases for weld traceability and reporting.
- Ensured data accuracy and integrity across QA systems.

TECHNICAL PROJECTS

Medical Management System with Integrated Nutritional Module (Django, Python, MySQL, AWS EC2)

- Developed a scalable, HIPAA-compliant web platform for managing patient records, medical appointments, and clinical histories.
- Integrated a comprehensive nutritional evaluation module, enabling tracking of weight, BMI, dietary goals, and clinical observations.
- Implemented role-based access control, conflict-free scheduling, data validation, and security protocols to enhance data integrity and patient safety.
- Achieved high usability ratings (4.7/5) in functional testing, validating system stability, security, and scalability.

BitAgro Platform (Freelance) – Agricultural Product Marketplace

- Designed and deployed a web-based marketplace for agricultural trading using React and Node.js.
- Implemented secure user authentication, real-time product management, and transactional features.
- Integrated REST APIs for dynamic content updates and serverless deployment on Vercel.

EDUCATION

Bachelor's Degree in Software Engineering

Universidad Autónoma de Sinaloa – Mexico | Aug 2022 – Present

Bachelor's Degree in English Teaching

Universidad Pedagógica del Estado de Sinaloa – Mexico | Aug 2018 – Mar 2022

LANGUAGES

- Spanish: Native

- English: Advanced (C2)
